## Response to Amendment

1. The amendment filed 04/15/2002 under 37 CFR 1.116 in reply to the final rejection has been considered but is not deemed to place the application in condition for allowance and will not be entered because:

a. The proposed amendment raises new issues that would require further consideration and/or search.

The proposed amendments for claim 70 raises new issues because the cancellation of holographic and hologram and the insertion of image display surface broadens this claim.

The proposed amendments for claim 71 raises new issues because "said outer image" (paragraph (e)) and "means to scan said outer image on said photosensitive plane" (paragraph (f)) was not presented for consideration at the time of the last office action (final rejection).

The proposed amendments to figure 7 raise new issues because reference numbers 7 and 27 are not present in the proposed formal drawings submitted on 04/15/2002.

The proposed amendments to figure 2 present in the proposed formal drawings submitted on 04/15/2002 raise new issues and the issue of new matter because it is different than figure 2 of the foreign priority document and it does not correspond to the original specification at page 13 lines 6-9.

The proposed amendments to figure 3 present in the proposed formal drawings submitted on 04/15/2002 fails to resolve the issues raised in the final rejection at pages

3 and 4. Additionally applicants argument at page 6 paragraph labeled Fig. 3 is not supported by the specification. Page 14 line 11 to page 15 line 2 has been reviewed but support for piezoelectric element 14 to be at the end of the deflector 14 is not present in the originally filed specification.

- 2. Claim 71 written on page 5 did not follow the rules for making amendments to the claims because material to be deleted is shown in this allegedly clean copy of claim 71 is shown at line 4 within brackets as [presented]. The clean copy of the claims is not to show material deleted, the marked up copy is for this purpose.
